

2024 Baseball America Batting Pitcher Cards

Our Baseball America universe aligns fairly closely with the real-life world of big league baseball, so now that both pro leagues are using the designated hitter rule, we've decided to eliminate the batting ratings from the pitcher cards. We recognize, though, that there's a segment of the tabletop baseball gaming hobby who don't like the DH. For those gamers, we've created these batting pitcher cards, based on our previously-released express baseball card sets which also eliminated the batting ratings from the pitcher cards, for aesthetic reasons. You can either assign the cards as desired, or you can use a random dice roll with any two colored dice. Add the dice together and use the card that corresponds to what you rolled. Note that if you roll a "2," you can use either card "1" or "2."
