Note: The charts above are suggested only.
The offense may choose any chart at any time.

Note: When offense is in a "C" situation, defense is ALWAYS "Deep," regardless of whether offense chooses another chart.

Inside OPP 20 - No long passes
Inside OPP 10 - No medium passes

Instructions

1. Roll two die for the offensive play call and read in the normal Second Season manner.
2. Roll one 20-sided die for the defensive play call (or roll all 3 dice together to save time).

Note the defensive play call chart is below the offensive chart. Note also the optional situational charts at the bottom.

Play Call Adjustment Factors (PCAF)

Beside each play call column, there is a column with small symbols, such as "-1234 sho." This is an optional system whereby you rate the offense on its

Example

Offense's dice roll = 12
Defense's dice roll = 4
Offensive PCAF is -3
Situation = 1st & 10

Normally, a roll of 12 would produce an inside run, but for an offense with a rating of -2, -3, or -4, the call is changed to a short pass (as signified by the "-234

NOTE: "-P" on the defensive chart signifies a pass defense against an offense with ANY negative PFAC (-1, -2, -3, or -4).

Similarly, "+R" means use a run defense against an offense with ANY positive PFAC

Read "-S" and "+S" in a similar manner.

I merely used -P and +R to keep the column widths narrow so the spreadsheet could easily print on one page.

Optional Features

You may also desire to adjust the offense's base PCAF with a defensive factor (e.g., poor run defenses would have a +1 factor because the opposition runs more against them). Also, you may desire to adjust play calls for teams that run inside more than outside or throw long more than average (e.g., Raiders). One other thought is that instead of the A/B/C/D charts for "special situations," one could use +/- factors before using the A/B/C/D charts (e.g., team leading by 10 in early 4Q may desire to be a +2 to run a little more than average, but not as much as dictated by the "D" chart).
